

E-Commerce Website Development – Week 01 Report

Name: Mallika Devi Kerla

Project Title: E-Commerce Website using React and Vite

Objective: Develop a multi-page e-commerce website using React, Vite, reusable components, and React Router.

Technologies Used:

- React.js
- Vite
- HTML5
- CSS3
- JavaScript (ES6)
- React Router DOM

Pages Developed:

- Home Page
- Product Listing Page
- Product Grid Page
- Product Details Page
- Cart Page

Features Implemented:

- Component-based architecture
- Routing with React Router
- Navbar, Footer, Breadcrumb, Sidebar
- Product Grid and Product Details
- Shopping Cart page

Folder Structure:

src/assets, src/components, src/pages, App.jsx, main.jsx

Project Screenshots:

Insert screenshots of Home, Product Listing, Product Grid, Product Details, and Cart pages here.

GitHub Repository:

Paste your GitHub repository link here.

Conclusion:

This project demonstrates a React-based multi-page e-commerce website developed using reusable components and React Router.
